TITLE : ON-VEHICLE TELEVISION SET

ABSTRACT : PURPOSE: To make the screen of an on-vehicle television(TV) set visible from the driver's and assistant driver's seats by providing a feeding mechanism which pulls and pushes out the TV set main body into and from a casing and a supporting mechanism which supports the main body in a state where the main body can be turned in the vertical direction and couples the TV set main body with the feeding mechanism.

CONSTITUTION: This on-vehicle television(TV) set is constituted of a TV set main body 1 and a box type casing 2 for housing the main body 1 inside the casing 2 and a feeding mechanism 3 which pulls or pushes out the main body 1 into or from the casing 2 and supporting mechanism 4 which supports the main body 1 and couples the main body 1 with the mechanism 3 are provided in the casing 2. This TV set is incorporated in the dashboard of a vehicle and the main body 1 is housed in the casing in an almost horizontal state when the TV set is not used. At the time of using the TV set, the main body 1 is turned and erected with the screen forward after the main body 1 is pushed out by means of the feeding mechanism 3. Therefore, the screen becomes visible from the driver's and assistant driver's seats of the vehicle.
